

Earthquake

DROP

COVER

HOLD ON

Drop down on the ground to cover and stabilize, protect the head and neck, and pay attention to falling objects.

地震 Earthquake

Do not take the elevator

When you are in an outdoor space

- ※ Do not attempt to run indoors during the earthquake.
- ※ If the earthquake is in progress and you are in an outdoor space near by a building, tree or viaduct, you can protect your head and neck with your belonging and leave these high-risk areas.
- ※ Watch out if there are any potential falling objects, signboard and tile above you to avoid being harmed thereby.
